

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	18 June 2026
Student Name	Narendula Jashwanth
Project Name	ShopEZ – Full StackE-Commerce Platform Using MERN Stack
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming was conducted to identify and evaluate potential solutions for developing a secure, scalable, and user-friendly e-commerce platform. The generated ideas were analysed, grouped, and prioritized based on user requirements, business value, technical feasibility, and future scalability.

Step-1: Individual Project Planning and Problem Statement

This project is completed individually. The main aim of the ShopEZ project is to develop a simple e-commerce web application where users can register, log in, view products, add items to cart, place orders, and manage their profile. The admin can manage products and orders through the admin dashboard.

Brainstorm & idea prioritization

Use this template to identify, analyze, and prioritize ideas for developing **ShopEZ**, a MERN Stack E-Commerce Platform. This project focuses on creating a secure and user-friendly online shopping system that enables customers to browse products, manage carts, place orders, and track purchases while providing administrators with tools to manage products, categories, users, and orders efficiently.

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

Individual Project

- Project Name: ShopEZ – Full Stack E-Commerce Platform
- Keywords: MERN Stack, E-commerce
- Technology: Node.js, Express.js, React.js, MongoDB
- Project Type: Full Stack Web Application

Set the Goal

Develop a complete MERN Stack E-Commerce Platform that allows users to browse products, add items to cart, place orders, and track purchases while enabling administrators to manage products, categories, users, and orders through a centralized dashboard.

Learn How to Use the Facilitation Tool

- React.js for Frontend Development
- Node.js and Express.js for Backend Development
- MongoDB and Mongoose for Database Management
- JWT Authentication and Authorization
- MVC Architecture
- RESTful APIs
- Responsive UI Design

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

PROBLEM

How might we design a secure, scalable, and user-friendly e-commerce platform that enables customers to browse products, manage carts, place orders, and track purchases while providing administrators with tools to manage products, categories, users, and orders through a centralized dashboard?

Key rules of brainstorming

To run an smooth and productive session

🗣️ Stay in topic.

🕒 Defer judgment.

🗣️ Go for volume.

💡 Encourage wild ideas.

👂 Listen to others.

👁️ If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

The major ideas identified for the ShopEZ project are user authentication, product management, cart system, order management, user profile, admin dashboard, and database collections.

Brainstorm Ideas

- User Registration

- User Login
- View Products
- Product Details
- Add to Cart
- Update Cart
- Place Order
- Order History
- Admin Login
- Manage Products
- Manage Orders
- Users Collection
- Products Collection
- Cart Collection
- Orders Collection

Grouped Ideas

User Module: Registration, Login, Profile, Authentication

Product Module: View Products, Product Details, Search Products

Cart Module: Add to Cart, Update Quantity, Remove Product

Order Module: Place Order, Order History, Order Status

Admin Module: Admin Login, Manage Products, Manage Orders

Database Module: Users, Products, Cart, Orders Collections

Figure 3: Group ideas canvas for ShopEZ.

Step-3: Idea Prioritization

The project ideas are prioritized based on importance and feasibility. The most important and feasible features are selected for implementation first.

High Importance + High Feasibility

- User Registration
- User Login
- View Products
- Add to Cart
- Place Order
- Admin Product Management

High Importance + Low Feasibility

- Payment Gateway
- Delivery Tracking
- Advanced Search
- Product Reviews

Low Importance + High Feasibility

- Wishlist
- Profile Update
- Product Categories
- UI Improvements

Low Importance + Low Feasibility

- Recommendation System
- Live Chat Support
- Coupon System
- Multiple Language Support

Final Selected Features

The final selected features for the ShopEZ individual project are user authentication, product display, cart management, order placement, admin dashboard, and database management.

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

20 minutes

TIP

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the H key on the keyboard.

Conclusion:

Based on the analysis of user requirements, business needs, technical feasibility, and scalability considerations, ShopEZ was selected as the final solution. The project provides a comprehensive e-commerce ecosystem featuring secure authentication, product management, order processing, payment integration, and analytics capabilities while allowing future enhancements and expansion.
