

Ideation Phase Empathize & Discover

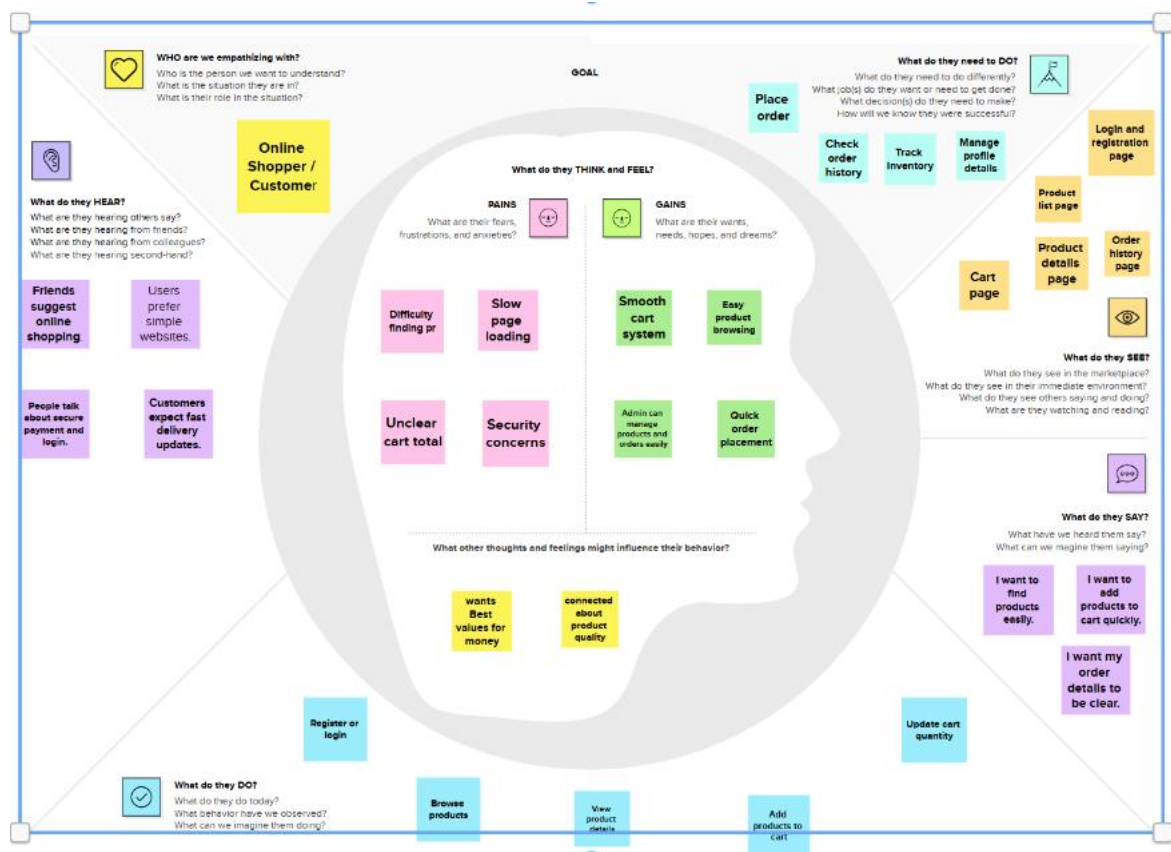

Date	18 June 2026
Student Name	Narendula Jashwanth
Project Name	ShopEZ – Full Stack E-Commerce Platform Using MERN Stack
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Key Insights from Empathy Map – ShopEZ

User Needs

- Users need a simple and easy shopping website.
- Users need secure login and registration.
- Users need clear product details.
- Users need an easy cart system.

- Users need quick order placement.
- Users need clear order history.

User Problems

- Users may feel confused if the website design is not simple.
- Users may face difficulty finding products.
- Users may worry about data security.
- Users may not understand cart total or order status clearly.
- Admin may face difficulty managing products and orders manually.

Project Solution

ShopEZ solves these problems by providing a user-friendly e-commerce web application. It includes user authentication, product browsing, product details, cart management, order placement, order history, user profile, admin dashboard, and database management.

Final Empathy Statement

The online shopper needs a simple, secure, and easy-to-use shopping platform because they want to browse products, add items to cart, place orders, and check order history without confusion.
