

Project Design Phase
Proposed Solution Template

Date	18 June 2026
Student Name	Narendula Jashwanth
Project Name	ShopEZ – Full Stack E-Commerce Platform Using MERN Stack
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Many users need a simple and secure online shopping platform where they can register, log in, view products, add items to cart, place orders, and check order history. Admins also need an organized system to manage products and orders.
2.	Idea / Solution description	ShopEZ is a web-based e-commerce application developed as an individual project. It includes user authentication, product browsing, product details, cart management, order placement, order history, user profile, admin dashboard, and database management.
3.	Novelty / Uniqueness	ShopEZ provides a simple user interface with both user and admin modules. It combines product management, cart system, order management, and database collections in one application.
4.	Social Impact / Customer Satisfaction	ShopEZ improves customer satisfaction by making online shopping simple, fast, and organized. Users can easily find products, manage cart items, and place orders without confusion.
5.	Business Model (Revenue Model)	The project can generate revenue through product sales, service charges, advertisements, promotional listings, and commission-based product selling in the future.
6.	Scalability of the Solution	ShopEZ can be expanded by adding payment gateway, wishlist, product reviews, delivery tracking, discount coupons, recommendation system, and mobile application support.
